

PRODUCT GUIDE 2023

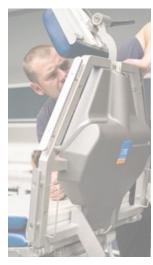

About us

"We develop products for the most brilliant machine there is – the human body."

Jürgen Scherrieble

We started out with a vision - "Designed from the practice - for the practice"

UFSK-OSYS has been developing highly specialized mobile treatment and surgeon's chairs for ophthalmology for almost 30 years - in close cooperation with renowned ophthalmic surgeons. We believe in never losing sight of what really matters, while keeping a keen eye on the latest advances in medicine. Our core competency: the precise and safe positioning of both patient and surgeon for eye surgeries and microsurgical procedures in the head area. To address this challenge, we build tailor-made work platforms offering the latest in technical and functional sophistication while making your OR management super efficient.

The "Mobile Table Rotation" is our signature workflow concept designed to handle rapid surgery cycles with high patient turnover. This concept has been one of our international bestsellers for years, especially in the field of ophthalmology! Thanks to state-of-the-art materials and sophisticated technical details, our equipment is durable and easy to maneuver at the same time while helping to make your "surgical rotation schedules" efficient and back-friendly.

UFSK-OSYS treatment and surgeon's chairs - "Made in Germany" - are used all over the world and are supported by a network of qualified **UFSK-OSYS** service partners around the globe.

We have good reason to be proud of this market presence, which is the fruit of our long-standing quality policy and customer-focused corporate philosophy. Whether in development, design and product approval or production, sales, logistics and after-sales - we believe in adding our own design contributions to all areas, and we believe in optimizing, communication and confidence building.

We believe that this is the way to create the best and most exciting products - the result of good cooperation and mutual inspiration!

Come and discover our latest ideas!

Facts

Every minute counts

Optimized workflow

Less and less time for more and more patients? Tight calculations and falling return on investment? Clinic-friendly rotation systems are a big help for cutting down on average surgery times because every minute counts.

While you are operating on a patient, another patient can be prepared while yet another patient can recuperate. Your patient never needs to leave his or her seat. With the simple push of a button, You can conveniently adjust the treatment chair into operating table position - comfort right from the start.

UFSK-OSYS operation chairs per OR on average.

cataract surgeries per day.

Well over

UFSK-OSYS operating systems worldwide.

UFSK-OSYS equipped

Core competence

Ophthalmology

For almost 30 years, UFSK-OSYS has been developing its products in close cooperation with internationally renowned ophthalmic surgeons, true to the motto:

"Designed from the practice - for the practice"

exclusive mobile eye surgery and surgeon's chairs. Considering the very high patient turnover in this medical field and the global use of our products, we want to offer our customers a service friendly technology designed to state-of-the-art quality standards.

Further medical specialties

I.V.I. treatment

Neurosurgery Microsurgery

Implantology Oral surgery Maxillofacial surgery

Aesthetic surgery Plastic surgery Hair transplantation

Dermatology

ENT surgery

Well over **7.000.000**

operating cycles on UFSK-OSYS operating systems per year.

Surgery according to the principle of rotation

Thanks to the mobility of **UFSK-OSYS** treatment chairs, patients can be pushed directly from the preparation room into the operating room - without having to get up. After surgery, patients can be taken to the recovery room on the same chair. This quickly frees up your operating theater for the next patient. What better guarantee for a high patient turnover - while saving you time and money!

1 Simple and Secure Access

The low access and sitting height support even physically handicapped patients while getting into the chair.

2 Innovative Patient Transport

The "intelligent" chassis ensures effortless patient transport even through narrow passages and on longer routes.

3 Preoperative Preparation

Headrest, backrest, seat surface and footrest are infinitely adjustable via electric motors – at the touch of a button – allowing you to immediately create the perfect surgery conditions for surgeon and patient alike – without losing unnecessary time.

MOBILE TABLE ROTATION

6 Comfortable and Convenient Exit

The chair automatically adjusts to the exit position allowing patients to depart easily and safely.

5 Enhanced Postoperative Relaxation

From the operating room directly to the wake up phase, allow your patients to start recuperating right away in an anatomically correct relaxation position which is initiated at the touch of a button – without need of first shifting or relocating the patient.

Utilizing the chair's memory function, a surgeon can retrieve his or her ideal patient position at the push of a button. Total ergonomic design ensures outstanding comfort – before, during and after a procedure.

Corporate philosophy

Innovations

Intelligent solutions for your workplace

In constant search for perfection, we specify innovative details in our designs and functionality of our products. For even more

- Mobility
- · Ease of use
- · Comfort in seating and reclining
- Corporate healthcare

Intelligent design that promotes mobility

Our highlights

Battery technology

usage, independent from electricity supply - powerful and eco friendly

e-drive

The electronic pushing aid, easy patient transfer - without much effort!

Memory-position and Auto-Run-function

for frequently used treatment positions - time saving and useful

Sterile Controlling

made easy - with pop-up operation, joystick or foot pedal rocker switch

Steering-Guide function

easy steering - without great effort!

"SES" Surface-Extensions-System

For sliding the patient safely and comfortably into new positions

UFSK-OSYS Practical Intelligence

Design and production

Developing and manufacturing treatment and surgeon's chairs of sophisticated and sustainable product quality has been our top priority for years. We believe in your ideas and suggestions as an excellent opportunity for continuously improving our products to give you the best possible equipment to work with.

We design and build our products in small series for maximum quality monitoring and process control. Every single piece of equipment undergoes 100% check-out!

UFSK-OSYS manufactures more than "tables and chairs". World-class medical and technical equipment. In *premiumLine*, *performanceLine* and *functionalClass* Quality.

Preventive technology

Reduced illness rate and improved productivity

We developed both our treatment chairs and tables and our surgeon's chairs and assistant chairs based on empirical studies - especially for eye and micro surgery. When designing and engineering our products, we paid special attention to the physical strains caused by poor posture in daily work life. Our products make it so easy to prevent back and neck problems, intervertebral disc problems, or fatigue symptoms.

Patient-oriented perfection in every detail

- High-precision armrest systems with featherweight guidance for personalized positioning
- e-drive system
- · Steering Guide
- · Adequate seat inclination
- Lumbar support
- Lightweight chassis

Investment

Investing with foresight into the future

In 2020, we expanded our production facilities and capacities at the Regensburg site for the third time, thus creating the spatial and personnel resources for the sustained positive further development of our company. For even more efficiency and performance!

UFSK-OSYS quality

Quality monitoring

We define "quality" not only by the end product but in all processes, and we are dedicated to continuous improvement. We believe in supreme quality - both in our products and in our services - and we dare you to put us to the test! Our certified QM system meets the requirements of ISO 13485:2016, i.e. it meets the particular performance and safety criteria imposed for the development, manufacture and sale of medical devices.

Beyond complying with the technical product standards (DIN/EN/IEC) and legal conformity requirements (CE, FDA, etc.), we are living these quality standards. Both "before" and "after" a customer's purchase, **UFSK-OSYS**'s staff makes sure of giving the best possible support: best-possible choice of products, regulatory support, shipping, and after-sales service.

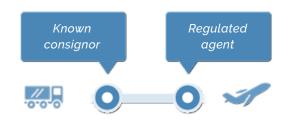

Modern logistics and International sales

Worldwide shipments - fast and reliable

Every year, we dispatch about 1,000 bulk deliveries and 2,000 packages - including urgently needed spare parts, medical accessories - as well as demo, replacement and rental equipment!

One of our guiding principles says that deliveries of goods and services in the medical sector cannot be delayed! Our contribution: well assorted and monitored spare parts management, fast response times plus air freight status as "known consignor". As part of the secure supply chain, our shipments are made in compliance with special security precautions and standards.

Urgent deliveries benefit from simplified and accelerated air freight handling processes - from dispatch to loading onto the aircraft - a time edge you will enjoy every time when ordering our medical equipment.

Headquarter Germany

Our worldwide distributor network meets your demands

every single day

UFSK-International OSYS GmbH

We believe in long-term, fair and successful cooperation with our customers as our number-one priority governing all of our actions.

In addition to our know-how and long-standing experience, we believe especially in identifying your needs and expectations, and to make them a reality - in an exciting and exuberating joint effort. The secret of our success: keeping in touch and keeping up the dialogue.

We are connected to our customers 24/7 via our worldwide distributor network. Don't hesitate to use our customer hotline and online support. We offer regular live webinars, especially for our distributors.

Come and visit us at international trade conferences or at our Regens burg training center.

"Big enough to be everywhere small enough to stay in touch"

premiumLine

Our top model

As the fruit of our decades of experience in the field of ophthalmic and microsurgery, we have managed to design the absolute high-end, top quality model. Allow yourself to be swept away by the innovative materials, the visionary shapes, the elegant design and the sophisticated extra functions.

Set new standards in your operating room!

Come and discover the *eyeForce*, and be dazzled by its economy, effectiveness and quality. It is synonymous for top quality.

Optionally equipped with our *e-drive* system, it is the only treatment chair in ophthalmic surgery business that comes with an automatic easy-push aid. It is the *e-drive* that moves, not the human!

Demand the best!

PREVENTIVE TECHNOLOGY The "Preventive Technology" award reflects uncompromising lightweight construction, outstanding ergonomic operability, comfortable patient positioning and space-saving design. Back diseases of your operating theater staff are now a thing of the past.

This is our contribution to effective health and safety in the workplace.

The professional world is excited and has honored us with an award!

Our *premiumLine* eyeForce treatment chair was awarded the **i-NOVO**® **Awards Tech Winner** Innovation Prize - in recognition of the rational design and extremely high-quality workmanship.

We feel honored by this recognition and award.

eyeForce

Item No.: 1800 0000

Our most innovative and modern patient positioning system with auto-run functions - specialized for precision surgery in head area. With optional *e-drive* easy-push aid, Steering Guide and SES automated extension system - for even more ergonomics and economy at your workplace.

Trendsetting comfort and supreme quality

MED.TEC at its highest level

Double castors

Four fully rotating double-run castors for back-friendly and easy rolling motion.

Chassis

Precision lightweight chassis made of cast aluminum.

Frame

Lasercut procedure. Highly stable stainless steel frames. Including standard rails 25×10 mm for the attachment of a wide range of components.

Precise positioning of the head part

Sterile adjustment by surgeon/maximum legroom

Headrest

3D and longitudinally adjustable headrest element with head molding and neck support for guaranteed safe and correct positioning of the head.

Components

Headrest with ball joint and more

Discover additional features and extensive components on page 22-23.

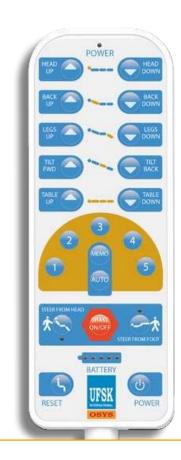

Positioning

()

The *eyeForce* treatment chair is adapted for patient positioning and ergonomic and comfortable patient treatment, in particular for outpatient surgical techniques, and offers versatile adjustment of the head, back, seat and leg sections and overall chair height for patient transport.

- Five freely configurable memory positions
- Reset button
- Auto run function
- · Battery charge indicator

Hand control

Activate memory function/automatic movement

It is possible to save 5 MEMO positions: Set the desired position (hold down the MEMO key until the orange LED lights up). Then press the numeric key of a memory location for a MEMO position - the MEMO position is now saved.

Press and hold "AUTO" until the LED lights orange, then briefly tap on either 1, 2, 3, 4 or 5 to move to the desired position of the surgical bed.

All castors are braked (red)

Positioning by hand control

Standard recommended memo keys

"Steering Guide" maneuvering aid

Operation via push handles and hand control

The *eyeForce* treatment chair offers an electronically controlled braking system with "Steering Guide" function. In addition to "free movement" and "brake applied" the treatment chair offers directional guidance as an additional electronic wheel positioning function. This additional function facilitates the controlled maneuvering of the chair by just one person and can be activated from both sides of the chair via the chair handles or optionally via the hand control.

Directional guidance is activated (orange)

Directional guidance is deactivated (green)

Surface-Extensions-System "SES" positioning aid

Automated solution for patient positioning

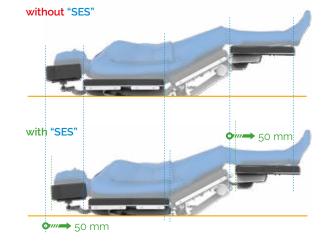

Both the backrest and the legrest segments automatically move 50 mm along with the patient when moving the chair into the reclined or entry position. The "SES" avoids patient repositioning, which would otherwise be necessary, by extending and flexing the individual segments. Returning the leg segment to the entry position reduces the entry height by an additional 50 mm.

Retractable push handles

Manually adjustable push handles on the foot end with automatic return function, for easy patient transfer.

Movement in reclining position

Movement in entry position

eyeForce + e-drive

Item No.: 1800 0000 + 3316 0000

Powerful yet gentle.

e-drive system for effortless and rapid movement of the chair over long distances. The new optional system consists of a 5th wheel with drive motor. It serves as a pushing aid for easy forward and backward movement – with an extra range of 2 kilometers per battery charge. The system's operation is identical to that of the "Steering Guide" system, via the respective push handles with potentiometer for infinite and precise speed adjustment. It is possible to integrate the system any time at a later date.

The electronic push-aid

Control over push handles

Push handle at the left head/foot end with a rocker switch for moving the treatment chair forward and back.

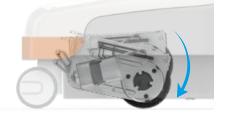

Push handle at the right head/foot end with a potentiometer for speed control.

By switching on the fifth electronically drive wheel in the chassis of the chair, the physical labor of the person doing the pushing is noticeably reduced.

- Shock-free transport
- Long-lived design
- · Optimum floor contact
- Long range

The ease of pushing - How much force is needed to move 300 kg? - Zero.

Who would have thought this is possible?

This is how far your staff pushes a load of 300 kilograms per year:

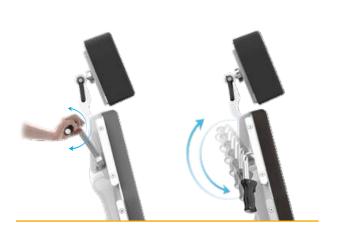

- approximately 70 meters per surgery round
- up to 10,000 surgeries per year each

This results in up to **700 km per year!**

Push handles 2.0 - perfect interaction - top-of-the line mobility and ergonomics.

performanceLine

Our classic

It represents proven and time-tested technology in a modern design, it is deliberately low-tech, and it offers an extremely attractive price-performance ratio.

Its chief benefits include space-saving design and outstanding maneuverability coupled with a lean range of easy-to-manage functions.

Do you want flexible use in confined spaces with power-supply independent battery operation?

Then you should go for our classic: The 500 **XLE** or 500 **XLE** comfort, for optimal combination with our surgi**Line** and surgi**Trend** surgeon's chairs.

performanceLine systems are designed for user satisfaction

Designed for continuous use in serially equipped operating rooms with high patient turnover, the *performanceLine* satisfies every user thanks to its easy handling before, during and after the surgery.

An award-winning "Preventive Technology", the **performance**Line works hard to protect your surgical staff from back problems, thanks to its lightweight construction and easy maneuverability.

Less is more - more benefits

500 XLE comfort

Item No.: 1500 0006 + 3037 0080

Our 500 **XLE** with extra thick upholstery, integrated knee support cushion and flattened neck area - for extra reclining comfort.

Outstanding comfort, particular flexibility.

Upholstery

Comfort

Thick comfort upholstering and integrated knee support cushion, individually positionable to suit every patient's body height. The treatment chair featuring comfort upholstering is particularly well suited for longer surgical procedures (e.g. retina surgery).

Available in a wide variety of colors. Please refer to page 100 for our complete range of colors.

Flexibility in every detail

Headrest

The flattened back cushion of the Comfort upholstery in the neck area offers maximum freedom of movement for the headrest.

Integrated knee support cushion

Optimum patient comfort thanks to the integrated knee support cushion which can be easily adjusted to accommodate any patient height.

Components

Foot part extension

Adjustable foot part extension incl. foot support for easier entry and exit of the patient.

Besides, entry height is reduced by 80 mm.

functionalClass

What procedures will you perform?

Excellent functionality at minimum cost for successful outcomes in the operating room. Mobile options for use in any size facility. Keep patient care number one on your priority list.

500 XLS - essential tool in oral and maxillofacial surgery

It has never been so simple to adapt new technology in your daily workflow.

- Multifunctional horseshoe shaped headrest element featuring two-dimensional and longitudinal adjustment
- Power supply-independent battery box with integrated emergency stop button

500 **ECO** - ideal for I.V.I. treatments

Basic budget friendly treatment chair for walk-in OR concepts and Intravitreal Injection (I.V.I.) treatments.

- JUST WALK-IN OR: in 5-6 seconds in OR-Position
- Direct power connection

400 XL - highly functional basic foot hydraulic treatment table

This entry-level model is based on a rugged and easy-to-use technology. Its function is independent of batteries to keep procurement costs low on the one hand and ensures a long service life on the other hand.

- · Comfortable three-piece cover surface
- · Can be used in any location

400 XL

Item No.: 1400 0001

Highly functional, basic hydraulic treatment table. The great freedom of movement and ample legroom for optimum access to the patients. The 400 XL treatment table can be rotated by 360 degrees to also allow even lateral movements. Our entry-level model is based on a rugged and easy-to-use technology. In contrast to our electromechanical models, its function is independent of batteries. This keeps procurement costs low on the one hand and ensures a long service life on the other hand.

Can be used in any location

Easy to service and maintain

Outstanding resistance to tipping

Ergonomically shaped push handles

Designed for optimized function

Chassis

Gentle and stable hydraulic system for patient positioning. Foot pedal for hydraulic adjustment of head, back, leg part and overall up/down adjustment – guaranteed to last.

Double castors

Large double castors for easy moving and maneuvering by one person, even in confined spaces. Effortless directional stability - direction-setting castor, manually adjustable via foot pedal. Central foot brake acting on 4 castors.

Headrest

3D and longitudinally adjustable headpart with head molding and neck support for guaranteed safe and correct positioning of the head.

supportLine plus

Item No.: 3351 0045

The *supportLine*'s maneuverability, optimised stability and resistance to tipping, its stainless steel design for the user's operating area and its hard-wearing, hygienic surfaces are designed specifically for versatile use in the operating room. The *supportLine* plus mobile instrument table is a 20 cm higher version.

Technical specifications

Chassis

Footprint4 castors680 x 400 mm9 50 mm

Lifting column

• Height adjustment 930 – 1,185 mm

Stainless steel tray 660 x 540 mm

Upper frame 715 x 540 mm

Weight 17.5 kg

Max. load 10 kg

Subject to technical modifications..

Tray

The removable, high-quality stainless steel tray is heat-resistant, easy to clean and disinfect and offers plenty of space for holding surgical instruments with an area of 66×54 cm.

Push handle/double castors

Its wide push handle and maneuverable double castors make the *supportLine* easy to position.

stayClean

Cover drapes

Item No.: 3034 0014 2,000 x 730 mm, box á 160 Pieces, 4x 40 Pieces

Treatment chairs – ready for the next patient in no time. Perfect fit.

Equipment protection made easy

Application example 500 $\it XLE$

Equipment protection – cover drapes for treatment chairs

Perfect protection of the equipment

- Protection against corrosion
- Perfect-fit synthetic equipment protection including barrier function
- Minimized soiling of the upholstery
- · With integrated headrest hood
- "Two layer" composite material made from PE film (undersite) and PP non-woven flocking

Hygienic protection for the patient

- · Disposable product, hygienically packed
- · Pleasant soft feel
- Absorbent and tear-resistant
- Impermeable to liquids and waterproof

The functional disposable cover drape

Advantages

- Easy replacement of used drapes
- No sliding thanks to the hood
- Enormous time savings
- Low purchasing costs

Application

Application example 500 **XLE**

stayClean roll

Paper roll

Item No.: 3034 0021 Carton á 9 pieces (á 50 cm x 50 m)

The stay Clean roll tear-off cloths protect your treatment chairs and tables perfectly and quickly ensure hygiene. The perforated cellulose patient pads are particularly user-friendly as they can be easily unrolled and torn off, allowing controlled consumption.

The practical disposable cloth from the roll

Perfect protection of the devices and practical hygiene protection for patients

- Thanks to its short perforation, the stay Clean roll is suitable for all common treatment chairs and tables
- The 2-layer pulp is very absorbent and excellently suitable for everyday use for outpatient treatments
- · The very soft and skin-friendly texture provides a pleasant feeling of lying and hygiene

Scope of delivery

9 rolls (á 50 cm x 50 m) made of pure cellulose, hygienically single packed

premiumLine

Our top models

As the fruit of our decades of experience in the field of ophthalmic and microsurgery, we have managed to design absolute high-end, top quality models. Allow yourself to be swept away by the innovative materials, the visionary shapes, the elegant design and the sophisticated extra functions.

Set new standards in your operating room!

Discover our *surgiForce* and *surgiForce* light models and allow yourself to be swept away by their economy, effectiveness and quality. These models stand for ultra-precise navigation within the operating field, sterile operation, and a comfortable, non-fatiguing work environment – for a work flow worthy being rated "Premium deluxe". They combine particularly well with our *premiumLine* eyeForce treatment chair.

Demand the best!

The "Preventive Technology" award reflects uncompromising lightweight construction, outstanding ergonomic operability and space-saving design. Back diseases of your operating theater staff are now a thing of the past. This is our contribution to effective health and safety in the workplace.

Item No.: 2600 0008 with Formed seat (Illustration)

That is high tech and high precision.

The ultimate surgeon's chair for microsurgery.

Sophisticated engineering, design and function down to the smallest detail. Amazing range of armrest adjusting functions: Turn it, tilt it, rotate it, extend it – to support each of the surgeon's arm movements with the greatest of ease! Ultra-precise navigation within the operating field, sterile operation, and a comfortable, non-fatiguing work environment – for a work flow worthy being rated "Premium de luxe".

MED.TEC at its highest level

Double castors

The five high-grade double castors are smooth-running and rotated by 360 degrees. This means no-limits mobility, especially in confined operating room spaces. *surgiForce's* central front castor in particular gives extra stability to keep the treating surgeons safely in place whenever they shift their bodyweight forward.

Chassis

The drive mechanism's base is made of cast aluminum. This means maximum stability and longevity and no-limits mobility. The material and workmanship meet the strictest sanitary requirements.

Plastic cover panels

The high-sheen plastic cover panels with their scratch-resistant and impact-modified surface finish are extremely hygienic and easy to disinfect. Abrasion-resistant corner guards (orange) made of synthetic rubber take the stress out of maneuvering *surgiForce* even at close quarters to other medical equipment.

Mains-free operation

The charger-battery-control unit integrated in the drive mechanism permits mains-free operation at protective low voltage. Splash-protected charging socket on the bottom of the drive mechanism.

Braking system

The easy-to-reach and easy-to-use central brake acts on all four double castors to keep the *surgiForce* safely and reliably in the desired position.

Multi-function unit

Foot operated

To activate the multi-function unit, tap it with your foot. It allows the effortless powered height adjustments of the seats and armrests, independently of each other.

Sterile operation

Black pedal: seat height adjustment

Gray pedal: arm height adjustment

Armrests with "de luxe" feature

3D freedom of movement

High-precision, maintenance-free ball joint for full 360-degree range armrest movements around all axes. Ultra-lightweight guide system for fast, efficient and vibration-proof adjustment of individual underarm positions.

Need to readjust *surgiForce* while maintaining sterile conditions? Not a problem! In addition to the foot keypad, *surgiForce* features so-called "one-hand triggers" underneath the armrests. Lift them briefly to adjust the height!

Angled armrest support for increased freedom of armrest movement around the lateral axis.

Seating systems

The seating system Comfort:
With mechanical individual adjustment functions. For a correct, back-friendly sitting and working posture, the seat surface or the seat depth can be adjusted by a sliding mechanism located underneath the seat.

The form seating system:
With enlarged contact surface for more comfort and optimum weight distribution.
The seat surface can be individually tilted forward and fixed together with the backrest.
In addition, angle and height adjustment of the backrest ensure an ideal sitting posture.

Seat angle adjustment

Seat angle adjustment

Back angle adjustment

Back angle adjustment

Back height adjustment

Back height adjustment

Linear guides

To give you that extra margin of flexibility: Armrests with linear guides! Applying pressure with your forearm will make the arms "glide" effortlessly in longitudinal direction while letting go will stop them by self-locking mechanism - available as an option.

Armrests

Made of molded PUR foam pleasant to the touch. no slick leatherette cover for quaranteed secure hold. Suitable for disinfectants.

surgiForce light – extraordinary technology and materials in typical *surgiForce* premium design, in combination with other control elements:

A clearly structured twin foot keypad plus manually operated gas spring mechanisms in the arm supports – for surgeons wishing to precision-adjust their arm position with minimum fuss.

MED.TEC at its highest level

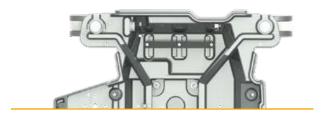

Double castors

The five high-grade double castors are smooth-running and rotated by 360 degrees. This means no-limits mobility, especially in confined operating room spaces. *surgiForce's* central front castor in particular gives extra stability to keep the treating surgeons safely in place whenever they shift their bodyweight forward.

Chassis

The drive mechanism's base is made of cast aluminum. This means maximum stability and longevity and no-limits mobility. And the material and workmanship meet the strictest sanitary requirements.

Plastic cover panels

The mirror-finish plastic cover panels with their scratch-resistant and impact-modified surface finish are extremely hygienic and easy to disinfect.

Mains-free operation

The charger-battery-control unit integrated in the drive mechanism permits mains-free operation at protective low voltage. Splash-protected charging socket on the bottom of the drive mechanism.

Braking system

The easy-to-reach and easy-to-use central brake acts on all four double castors to keep the *surgiForce light* safely and reliably in the desired position.

Multi-function unit

Foot operated

Timeless foot keypad design for UP/DOWN seat height adjustment with non-slip polyamide touch surfaces. Easy-to-reach brake levers on either side of the driving mechanism for centralized braking/unfettered maneuvering.

Armrests with gas-spring mechanism

3D freedom of movement

Armrest height is adjustable independently of seat height. It takes only simple rolling movement to manually control the gas spring mechanism.

Turning, tilting, rotating: The armrests have been designed for fast and unfussy 3D movements.

Need to readjust *surgiForce light* while maintaining sterile conditions? Not a problem! In addition to the foot keypad, *surgiForce light* features so-called "one-hand triggers" underneath the armrests.

High-precision, maintenance-free ball joint for full 360-degree range armrest movements around all axes. Ultra-lightweight guide system for fast, efficient and vibration-proof adjustment of individual underarm positions.

The Comfort seating system:
with mechanical individual adjustment functions.
An additional lumbar support as a backrest
provides relief for the spine. Sliding carriage for
adjusting the seat depth optionally available.

The form seating system:
With enlarged contact surface for more comfort and optimum weight distribution.
The seat surface can be individually tilted forward and fixed together with the backrest.
In addition, angle and height adjustment of the backrest ensure an ideal sitting posture.

performanceLine

Our classics

They represent proven and time-tested technology in a modern design, they are deliberately low-tech, and they offer an extremely attractive price-performance ratio.

Space-saving design and outstanding maneuverability coupled with a lean range of easy-to-manage functions.

Do you want flexible use in confined spaces with power-supply independent battery operation?

Then you should go for our classic:
The *surgiTrend* and *surgiLine* models – perfect in combination with our *performanceLine*, *500 XLE* and *500 XLE comfort* treatment chairs.

performanceLine systems are designed for user satisfaction

Designed for continuous use in serially equipped operating theaters with high patient turnover, the *performanceLine* satisfies every user thanks to its easy handling before, during and after the surgery.

An award-winning "Preventive Technology", the **performance**Line works hard to protect your surgical staff from back problems, thanks to its lightweight construction and easy maneuverability.

Color cards

Customize the upholstery of your products to color-coordinate them with your workplace environment.

To do this, select one or two colors (main and accent color - as with the 500 XLE comfort and 500 ECO) from one of the following color cards.

Application example motionLine-E

The colors displayed on your device may differ slightly from the original colors. If you wish to receive original color charts, please contact us at info@ufsk-osys.com.

Example: standard version

Item No.: 1500 0006 + 3037 0080

Examples of color combinations

"Tundra skai"

High quality skai® material with fine calf leather grain and subdued matte-glosseffect. The very extensive and trendorientated color spectrum enables many applications and combinations.

Product Specification

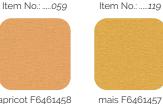

- · Long-lasting
- · Tear resistant
- · Easy to clean
- · Abrasion resistant (DIN EN ISO 6570-2)
- Lightfast
- · Disinfectant resistant
- · Biocompatibility: cytotoxicity (EN ISO 10 993-5) and epicutaneous test (EN ISO 10 993-10)
- · Blood- and urine resistant
- Phthalate-free
- Vegan
